

1.How to compare two JSON the same properties without order

a.Let obj1={name:"person1",age:5};

b.let obj2={age:5,name:"person2"};

Solution:

```
Let obj1={name:"person1",age:5};  
let obj2={age:5,name:"person2"};  
returnedTarget = Object.assign(obj1, obj2);
```

```
console.log(returnedTarget === obj2);
```
